

UPDATED May 14, 2020

**Weston's Farm COVID-19 statement and procedures for 2020 season:**

Along with the rest of the world we are working to adjust our lives and business for the upcoming year. These procedures will be evolving and changing as necessary.

As of this posting we are preparing to open for the season with mostly normal operations, but with necessary changes.

Our growing, harvesting and washing practices will effectively stay the same as those already had strict sanitary practices in place.

The *Fryeburg Market* will be open as in the past. We have made some changes inside the market to allow for better customer movement and distance at the registers. A plexi-glass shield separates the cashiers and customers. We will be requiring all customers wear a face covering inside our store and our employees will do the same. Cashiers will use hand sanitizer between transactions.

**WESTON'S TO GO APP: ONLINE ORDERING, PAYMENT and CUSTOMER PICK-UP**

This service will be available at the FRYEBURG MARKET ONLY, but will allow for sales with limited, to no, human interaction. This system will be a work in progress but we feel it will be a convenient and safe method to purchase our most popular farm items.

The *Conway Market* will be open as in the past. We are planning some redesign for better customer movement and screening for the cashiers. Cashiers will use hand sanitizer between transactions.

The Conway Market is an open air business, which can be hot in the summer, and difficult for our employees to wear a face covering all day, so we will not require them to do so. However, we will ask our customers to wear a face covering.

We hope you stay safe in these extraordinary times.

Sincerely,

*The Weston Family*
